**iOS Developer** with 6 years of expertise, excelling in cross-functional, remote teams across multiple time zones to optimize products and elevate user experiences. Highly adaptable to various **schedules** and **time zone** requirements for seamless global **collaboration**. Experience with both personal and professional iOS App Development.

## WORK EXPERIENCE

### Ankix/Accenture | Senior iOS Developer

JULY 2025 – CURRENT REMOTE

- Drive **new feature development** for **Shoppers Drug Mart** pharmacy functionality within **Loblaw Companies Limited's** iOS app, Canada's **largest food and pharmacy retailer** serving over **15 million** customers weekly across **2,400+** stores nationwide.
- Collaborate in a cross-functional **team** environment with **Canadian and Portuguese** engineering teams, **UX/UI designers, product managers, Android developers, and backend engineers** across **Toronto, Montreal, and international** locations to deliver seamless digital experiences and meet aggressive **release timelines**.

### 8x8 | Senior iOS Developer

JAN 2022 – MAY 2025 REMOTE

- Enhanced 8x8 iOS app with **advanced call handling** and **messaging features** for **3M+** business users.
- Led **team onboarding** for 8x8 acquisition despite only **6 months**'s Fuze experience.
- Contributed to 8x8 winning **43 G2** customer satisfaction awards in 2024.
- Collaborated across **global** teams (Romania, Portugal, England, Canada) in remote environments.
- Collaborated on **accessibility** compliance work for new European regulations, ensuring iOS app meets 2025 accessibility requirements.

### Outlier/Scale | AI Trainer

OCT 2024 – JULY 2025 REMOTE

- Enhanced **AI model** performance for major companies including **OpenAI, Meta, and Google** through systematic code analysis and response optimization.

## Fuze | Mobile iOS Developer

AUG 2021 – JAN 2022 REMOTE

- Collaborated with a global team of **Canadian** and **Portuguese** engineers to **develop** and **enhance** features for the Fuze iOS app.
- Proactively adjusted to **Canadian** time zones to maximize **mentorship** access and enhance collaborative **learning** across international teams.
- Delivered innovative **call handling**, **messaging**, and **user interface** improvements that strengthened Fuze's **call center** capabilities, driving its acquisition by 8x8.

## WIT Software | Junior iOS Developer

NOV 2020 – AUG 2021 REMOTE

- Enhanced features for M-Pesa iOS apps, a leading mobile financial service with over **66.2 million** customers across 7 African countries, including **Kenya**, **Tanzania**, **Mozambique**, and **Ethiopia**.
- Collaborated with a cross-functional team using SAFe Agile Methodologies for rapid feature delivery.
- Contributed to a **multi-project codebase** tailored for regional apps, delivering innovative payment and transaction functionalities that improved user experience, accessibility, and platform reliability for a global audience.

## Softinsa (IBM) | Intern iOS

FEB 2020 – JUNE 2020 IN PERSON

- Independently built PauloAuto's iOS app from **ground up** during third-year computer engineering **internship** despite having **no prior** iOS development experience
- Managed complete development cycle from initial **low-level prototypes** through **client meetings**, requirements gathering, and iterative feedback sessions.
- Delivered comprehensive **demo presentations** and **final app delivery**, demonstrating strong client communication and project management skills.
- Improved PauloAuto's **inventory management** system, resulting in increased **operational efficiency** and enhanced user satisfaction across the organization.

## PERSONAL PORTFOLIO

### WalletVault | iOS | Personal | OpenSource | [App Store](#) | [Github](#)

- Designed and built an innovative **offline** card management iOS application using **SwiftUI** and **CoreData** in response to **personal** concerns about financial data **security**.
- Created **secure**, **self-contained** solution ensuring **100%** user control over **sensitive** financial information with no online dependencies or cloud storage.
- Enabled users to effortlessly **store**, **access**, and **share** card details while maintaining maximum **privacy** with all data remaining exclusively on device.

## **ClearSound | macOS | [App Store](#) | [Github](#)**

- Designed and built an innovative macOS audio management application using Swift and AVFoundation to solve the **robotic voice quality** issue experienced when using **Bluetooth headphones** for video calls.
- Created an intelligent, system-wide solution that automatically detects AirPods and other **Bluetooth audio devices**, seamlessly switching to **Mac's built-in microphone** while maintaining headphone audio output for **crystal-clear voice quality**.
- Developed **privacy-first architecture** with **100% local processing**, ensuring no **personal data collection** or transmission while delivering professional-grade **audio optimization** for remote work and communication.
- Implemented **subscription-based monetization** model with **free** and **pro tiers**, providing **basic functionalities** for all users while offering **advanced features** and **premium automatic input switch** through **in-app subscription**.

## **LabelAIScanner | iOS | [App Store](#) | [Github](#)**

- Designed and built an intelligent food ingredient scanner iOS application using **SwiftUI** and **Apple Intelligence** to help health-conscious consumers make informed decisions about their food purchases by analyzing ingredient safety and health effects.
- Created seamless **camera** and **photo library** integration with real-time **OCR** text extraction using Vision framework, enabling users to instantly scan product labels and receive **AI-powered** analysis of each ingredient's purpose, safety level, and potential allergens.

## **LANGUAGES**

- Fluent in **Portuguese**
- Upper-Intermediate in **English**

## **SKILLS**

**iOS Development:** Swift, SwiftUI, UIKit, Storyboard, UIKit Programmatically, CoreData, Realm, Combine, RXSwift, ReactiveCocoa, Swift Concurrency, iOS Performance Optimization, Accessibility, XCTest, Quick/Nimble, Apple Intelligence, GCD

**Development Tools:** Xcode, Git, Jenkins, App Store Connect, TestFlight, StoreKit, RevenueCat, Firebase.

**Software Development:** Code Review, RESTful APIs, Bash, Scripting, Jenkins, Github Actions

**Methodologies:** Agile, Kanban, SAFe

## **EDUCATION**

**Instituto Politécnico Viseu – Licentiate Degree, Computer Engineering**

SEP 2017 – JUNE 2020
